

Using park (system hold)

loop

telecoms made simple

You may park a call in one of ten slots in the system. The call can then be picked up by another extension.

When using the menu:

- When on a call.
- Press the “Program/Service” key.
- Arrow to and select “Park a call?” or press *56
- Dial the desired slot number, 0 through 9. Make a note of it
- If a negative tone sounds, select another slot.

To retrieve the call

- Press the “Program/Service” key.
- Arrow to and select “Retrieve call?” or press #56
- Enter the slot number you used to Park the call (0-9)

When using a programmed key:

- Press the “Park” key.
- Dial the number of the desired slot, 0 through 9. Make note of it.
- If a negative tone sounds, select another slot.

To retrieve the call,

- Press the “Park” key.
- Enter the slot number you used to Park the call (0-9).

If the call is not retrieved, it will recall the user that placed the call on Park.
